To: Competitors Representative – No.03 Crowdstrike by Riley  
Re: Technical Waiver - Required Component

Decision No: GT3-01  
Date: 4/28/23  
Time: 15:50

---

The series Technical Manager has presented a request to the Stewards for a 1-event waiver for the team to compete with a replacement throttle body that does not contain one required port, for the intake temperature sensor. The team has reported that their compliant throttle body has failed, and that a replacement part has been delayed in shipment.

After consultation with the series Technical Manager, and with the manufacturer’s representative who confirmed the shipment delay, and after further considering the matter, the Stewards grant a 1-event waiver to use the replacement part instead of the part listed on the homologation documents.
