

Technical Bulletin # 013

To: All GT World Challenge America Competitors

Subject: Pirelli WHB Rain Tire

Date: October 7, 2025

Effective immediately, the WHB specification of rain tires will be provided to GT World Challenge America. Teams may continue using the WHA specification if they have existing inventory, but there will be no performance advantage compared to WHB.

An updated P-Book, including DHG and WHB fitments for GT World Challenge America, has been posted to the Teams site as “**2025 Pirelli P-Book GTWCA v1.2**”

At the Indy event, WHB rain tires will be prohibited in GT America and GT4 America.
